

Shaikh Sameer Shabbir

Backend Engineer — Full Stack Engineer — Node.js — Express.js — React.js — Next.js

☎ +91-8379843464 — ✉ samsk7774@gmail.com —  LinkedIn —  Portfolio

PROFESSIONAL SUMMARY

Backend-focused Full Stack Engineer with 4+ years of experience building SaaS platforms, enterprise applications, workflow automation systems, and scalable web applications using Node.js, Express.js, React.js, and Next.js. Experienced in backend development, API architecture, authentication and authorization, database optimization, cloud deployments, and production support. Proven ability to deliver software from requirements gathering through deployment while collaborating with cross-functional teams and contributing to technical decision-making.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL

Backend: Node.js, Express.js, REST APIs, WebSockets, JWT Authentication

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS

Databases: PostgreSQL, MongoDB, MySQL, Prisma ORM

Cloud & DevOps: AWS EC2, AWS S3, Docker, CI/CD, DigitalOcean, Cloudflare

Tools: Git, GitHub, Postman, Knex.js

Backend Engineering: RBAC, API Security, REST API Design, Authentication & Authorization, Workflow Automation

PROFESSIONAL EXPERIENCE

Software Engineer

Feb 2025 – Present

Coreline IT Solutions — Pune, India

- Designed and implemented tenant-aware backend architectures supporting multiple client environments with secure data isolation.
- Improved API response times by optimizing database queries, indexing strategies, and backend processing workflows.
- Coordinated development efforts across multiple teams, participated in architectural discussions, conducted code reviews, and mentored junior developers.
- Built CI/CD pipelines that streamlined deployment processes and improved release consistency across environments.
- Implemented JWT authentication, RBAC authorization, and permission management across enterprise applications.
- Investigated and resolved production issues, improving application stability and reliability across multiple deployed systems.

Full Stack Developer

Feb 2023 – Jan 2025

ARA Global — Pune, India

- Delivered ERP modules supporting HR, payroll, attendance, reporting, and employee management workflows.
- Built 15+ React.js dashboards used by internal teams for operational and administrative workflows.
- Developed Node.js APIs supporting high-volume business operations and reporting workflows.
- Reduced system latency by 40% through backend refactoring and database optimization initiatives.
- Implemented WebSocket-based real-time functionality supporting live updates across business modules.
- Designed PostgreSQL and MongoDB schemas supporting scalable data management and reporting requirements.
- Introduced structured logging and centralized error handling improving application stability.
- Built reusable backend components reducing implementation effort across multiple projects.

Freelance Full Stack Developer (Remote Contract)

Feb 2022 – Jan 2023

- Delivered 20+ custom websites and web applications and backend systems for startups and small business clients.
- Built React.js frontends and Node.js backend services supporting client-facing business operations.
- Developed administration portals, management systems, and workflow automation solutions.
- Designed relational database schemas and implemented complex business processes.
- Integrated payment gateways, authentication systems, and third-party APIs.
- Managed complete software delivery lifecycle from requirements gathering to deployment.

KEY ACHIEVEMENTS

- Improved API performance through indexing strategies, query optimization, and backend refactoring.
- Streamlined deployment workflows through CI/CD automation and release standardization.
- Contributed to the successful delivery of enterprise SaaS platforms across education, HR, workflow automation, and digital asset management domains.
- Collaborated with engineering teams to deliver production-grade applications from development through deployment.

SELECTED CLIENT PROJECTS

StudyPulse — Learning Management SaaS Platform

Node.js — Express.js — PostgreSQL — React.js — Next.js

- Delivered SaaS learning platform supporting 30k+ students, faculty members, and administrators.
- Built examination workflows including scheduling, question banks, evaluation, and automated result generation.
- Implemented role-based access controls supporting multiple user personas and permission hierarchies.
- Integrated subscription billing and payment workflows supporting platform monetization.
- Developed analytics dashboards providing institutional insights and performance reporting.

Design Editing Platform for Digital Asset Generation

Node.js — React.js — PostgreSQL — Cloudflare

- Built browser-based design platform supporting dynamic template editing and branded asset generation.
- Developed real-time editing workflows enabling content customization and template reuse.
- Implemented export generation and asset rendering workflows for downloadable content.
- Integrated Cloudflare CDN and storage improving media delivery performance by 60%.
- Designed backend services supporting purchases, asset generation, and download management.

POST EAT — Food Delivery Platform

Node.js — PostgreSQL — React.js — WebSockets

- Delivered full-stack food delivery platform supporting customers, restaurants, and delivery partners.
- Implemented real-time order tracking and status synchronization using WebSockets.
- Designed order lifecycle workflows from placement through successful delivery.
- Built menu management, checkout, payment processing, and order management systems.
- Developed backend services supporting 100+ concurrent order operations.

KT Guru — Knowledge Transfer SaaS Platform

Node.js — React.js — WebSockets

- Built SaaS platform supporting remote knowledge transfer and consulting sessions.
- Developed live collaboration features supporting concurrent participant interactions.
- Implemented secure session access controls and permission-based participant management.
- Improved platform responsiveness and reliability through backend optimization initiatives.

EDUCATION

Bachelor of Engineering — Computer Science

Dr. Babasaheb Ambedkar Marathwada University

Aurangabad, Maharashtra, India

Graduated: 2023
