PROFESSIONAL SUMMARY

Senior Full Stack Developer with 5+ years of experience building scalable enterprise applications across web, mobile, and desktop platforms. Expert in Node.js, React.js, Next.js, and modern JavaScript frameworks with proven track record of leading cross-functional teams and delivering high-performance solutions. Specialized in backend architecture, real-time applications, system optimization, and end-to-end software development lifecycle. Successfully optimized 7000+ lines of code improving performance by 40% and built complete ERP systems from scratch.

TECHNICAL SKILLS

Backend Technologies: Node.js, Express.js, RESTful APIs, Microservices Architecture, Socket.IO (Real-time)

Frontend Frameworks: React.js, Next.js, Redux Toolkit, Electron.js, HTML5, CSS3, JavaScript (ES6+)

Databases: MongoDB, MySQL, PostgreSQL, Database Query Optimization, Caching Strategies

Cloud & DevOps: AWS (EC2, S3, Lambda - Beginner), VPS Deployment, Git, GitHub, CI/CD Pipelines

UI/UX & Styling: Bootstrap, Tailwind CSS, Responsive Design, UI/UX Principles, Cross-browser Compatibility

Other Skills: Web Security, Code Optimization, Agile/Scrum, Team Leadership, Project Management, Client Communication, Code Documentation, Testing & Debugging, SEO Optimization

PROFESSIONAL EXPERIENCE

Senior Software Engineer

February 2025 – Present

Coreline IT Solutions

Aurangabad, Maharashtra, India

- Leading end-to-end software development lifecycle for multiple enterprise-level projects across web, mobile, and desktop platforms
- Managing cross-functional teams of 6+ developers, testers, and designers ensuring timely delivery and quality standards for production releases
- Translating complex business requirements into scalable technical solutions using modern tech stacks including Node.js, React.js, and Next.js
- Architecting and implementing microservices architecture for high-traffic applications with load balancing and fault tolerance
- Optimizing application performance through advanced refactoring, implementing caching strategies, and database query improvements resulting in 40% faster response times
- Handling post-deployment support, monitoring production environments, resolving critical issues, and implementing feature enhancements
- Establishing code quality standards, conducting technical reviews, and mentoring junior developers on best practices

Software Engineer

June 2024 – January 2025

Moksha Solutions

Aurangabad, Maharashtra, India

- Developed and maintained robust full-stack software solutions for clients across healthcare, education, and logistics domains
- Collaborated with cross-functional teams to gather requirements, design technical architecture, and deliver features meeting client specifications
- Implemented comprehensive testing strategies including unit tests, integration tests, and debugging to ensure 95%+ code reliability
- Improved application performance by identifying bottlenecks, optimizing database queries, and implementing efficient algorithms
- Conducted thorough code reviews ensuring adherence to coding standards, security best practices, and maintainable architecture
- Participated in Agile ceremonies and sprint planning, consistently delivering features on schedule and within scope

Back-End Developer

February 2023 – April 2024

ARA Global

Aurangabad, Maharashtra, India

- Built, deployed, and maintained internal web applications serving 500+ enterprise users with 99.8% uptime

- Led team of 6 developers, coordinating sprint planning, task allocation, and code quality assurance across multiple projects
- Analyzed and refactored 7000 lines of legacy code, optimizing 600 lines to increase overall system performance by over 40% through improved efficiency and reduced processing time
- Designed and developed complete ERP system including HR Payroll System from scratch, encompassing employee management, attendance tracking, salary processing, and report generation
- Implemented Socket.IO for real-time applications enabling instant notifications, live updates, and collaborative features
- Managed VPS deployments, configured production servers, implemented automated deployment pipelines, and ensured system security
- Served as primary client contact for requirement gathering, project updates, and technical consultations ensuring alignment with business objectives

Back-End Developer

February 2022 – February 2023

Techsparagus

Aurangabad, Maharashtra, India

- Developed RESTful APIs using Node.js and Express.js for web and mobile applications with comprehensive error handling and validation
- Implemented real-time features using Socket.IO for chat applications, live notifications, and collaborative tools
- Designed database schemas and optimized queries for MongoDB and MySQL ensuring data integrity and efficient retrieval
- Participated in Agile development processes including daily standups, sprint planning, and retrospectives

Software Engineer (Trainee to Jr Full-Stack Developer)

December 2019 – January 2022

VCS (Vaibhav Consulting Services)

Aurangabad, Maharashtra, India

- Promoted to Jr Full-Stack Developer within first year based on exceptional performance and technical contributions
- Contributed to ERP system development handling modules for inventory management, billing, and reporting
- Developed game backends implementing algorithmic logic for casino games including betting systems, win/loss calculations, and fair randomization
- Designed and developed user interfaces using HTML, CSS, Bootstrap, and Electron.js for desktop applications

EDUCATION

BAMU University

Bachelor of Engineering in Computer Science

August 2018 – May 2023

Aurangabad, Maharashtra, India

KEY PROJECTS

POST EAT - Australian Food Delivery System | *Node.js, React.js, MongoDB, Socket.IO*

2024 – 2025

- Led development of full-stack food delivery platform with customer, restaurant, and delivery partner modules serving Australian market
- Integrated real-time order tracking, live GPS location updates, push notifications, and secure payment gateway with order management workflows
- Ensured scalability and performance optimization handling high concurrent user traffic with efficient database indexing and caching

KT Guru - Global SaaS Platform | *Node.js, Next.js, Socket.IO, MongoDB*

2024

- Developed global SaaS platform for seamless knowledge transfer between consultants and clients with real-time messaging and file sharing
- Built scalable architecture using microservices supporting users worldwide with 99.9% uptime and sub-second response times
- Collaborated with cross-functional teams delivering high-quality web application reducing client onboarding time by 35%

Olive ProHealth Apps | *Express.js, MongoDB, RESTful APIs*

2023

- Built healthcare app backend enabling real-time consultations, prescription uploads, and secure chat increasing active users by 20%
- Developed job search platform connecting hospitals and medical professionals with job posting, filtering, and application tracking

- Implemented authentication, role-based access control, and secure data handling ensuring HIPAA-compliant data storage

Casino Games Suite | *Node.js, JavaScript, Socket.IO*

2021 – 2022

- Developed multiple interactive casino games (Roulette, DKD, 20000 Bet Game) with real-time betting logic and win/loss algorithms
- Implemented user wallet system, transaction tracking, game history, and ensured fairness using server-side RNG principles

StdFlix - Video Streaming Platform | *Node.js, React.js, Express.js*

2022

- Built video streaming platform for KG-8th grade students with kid-friendly UI, class-wise content filtering, and secure video hosting
- Enabled offline video download support for low-connectivity areas and developed admin panel for content management

Lakshmi Graphics Management System | *Electron.js, Node.js, MySQL*

2023

- Designed custom desktop solution for print business managing billing, inventory, orders, and GST calculations
- Improved operational efficiency by 60% through digitizing manual workflows with offline-capable desktop interface
